ON SHORE RENEWABLE ENERGY PROJECTS GRAHAM AND SIBBALD – CAPABILITY STATEMENT

Within Scotland there is a tremendous potential to promote soundly researched and well justified renewable energy projects in a way that works with the grain of the planning system. The Planning Team within G+S, alongside surveying colleagues, can assist landowners and developers with a planning and land led approach to all aspects of renewable energy projects.

Our services include:

- Strategic land and property opportunities reviews
- Option appraisals
- Local Development Plan and Supplementary Planning Guidance submissions
- Initial planning reports on potential projects
- Community consultation and consultation reports
- Planning application submissions and negotiations
- Assessment of applications
- Environmental Impact Assessments and Environmental Statements
- Appeals, Hearings and Inquiries – Expert Witness and Advocacy services
- Land valuation advice
- Project management and implementation

Recent renewable energy project clients include Reay Forest Estate (Grosvenor Estates), Cadogan Estates, Welbeck Estate, Northumberland Estates, Buccleuch Estate, Bourne Leisure, The Highland Council, and Wm Grant & Sons.

Recent wind farm renewable energy projects with which we have been involved include Fallago, Dorenell, Wester Dod/Aikengall, Calliachar, Griffin, Merranblo (Orkney), Logiealmond, Montreathmont, and Dunbeath.

The G+S planning team has considerable experience of working with and managing other consultants and working with Counsel. We can also draw on comparable international experience, especially in Scandinavia.

If you have any enquiries about any of our services please contact:
